Heavy Duty 'Site Pro' Grapple Handle: Rocks, Roots, Timber, Waste

Albutt **Site Pro** grapples offer ultra high strength not previously available on the European market. The unique design and the use of high strength materials allow the **Site Pro** to be used in the most demanding applications.

- Forestry
- Waste Handling
- Site clearance
- Demolition
- Rock & stone separation

Features:

- Unique tine design shaped for hard raking in both directions, dig up roots, rocks and trees.
- Tines manufactured from high tensile steel - 3 times the strength of mild steel.
- Tines resistant to breakage and bending
- Tines notched and welded to main frame.
- Teeth mesh to ensure a high pressure grip of material
- Meshed teeth can push material as small as 75mm - allowing fine raking in both directions.
- Move trees, rocks and waste without picking up dirt

Applications:

- Rake and push material
- Dig out roots and rocks
- Handle timber, brash
- Waste handling
- Separate loose material
- Rake in both directions
- Use with skid steers, telehandlers and loading shovels
