Superwinch Talon 9.5iSR 12v Winch - Synthetic Rope

Price inc VAT: £680.40

Code: SW1695211

Category: [9,000 lb \(4082kg\)](#)

Brand: Superwinch

The all new Superwinch Talon Range is designed from the ground up to completely change the way winches are developed and manufactured on a global scale. The 'Winch of Prey' is a direct replacement for the very popular 'EP' range of winches which have now been retired and are no longer available. Designed with both 4x4 and recovery use in mind, all seals on the Talon range meet the IP67 standard. This feature alone makes these winches an industry leader when it comes to being a truly sealed winch.

The new Talon range offers a host of game changing features, below is a summary of just a few of these features. Talon Highlights:

- The whole Talon range benefits from a truly sealed assembly. Every seal on a Talon winch is designed to reach the IP67 'Ingress Protection' standard.
- The sealed motor delivers a quick but safe line speed at a low amp draw. Heat sink styled motor cap maintains low temperatures under the heaviest loads.
- Fitted with a newly designed system, the brake inside the Talon is 100% load-holding with zero drag. The brake is located inside the gearbox to protect against heat transfer to the drum.
- Making a change from the industry standard, the Talon has three tie bars rather than the usual two. The Laser etched aerodynamically-shaped extruded aluminium tie bars reduce the winches weight.
- The chrome plated aluminium ergonomic free spool knob lifts and turns effortlessly. If the winch is to be fitted to a bumper, the handle can easily be rotated in 45 degree increments.
- Supplied with an ergonomically shaped, sealed, wired hand control with brilliant LED light assists in night time winching, the remote also meets the tough IP67 standard, which ensures keeping out of water, mud, snow and dust.
- A very useful feature is the new coiled cord hand control which extends to 15' and retracts to 4'. The hand Talon hand control connects to winch with a sealed military style twist-lock plug and includes a strap for easy storage.
- The all new VS4 Solenoid (vented, submersible and stabilized with sealed socket) is, quite simply, the best winch solenoid in the world. Again designed to meet the IP67 standard, its patented 'venting' feature provides protection against internal condensation and allows the contacts to resist water.
- Rubber insulated solenoid mountings protect and stabilise the solenoid to reduce vibration and increase lifespan.
- Covered by a limited Lifetime Warranty which includes an industry first

More Information

Part Number	SW1695211
Voltage	12v DC
Capacity (Rated Line Pull of Bottom Layer)	9,500lb (4309kg)
Motor	5.2 hp
Gearing	2 Stage Planetary
Gear Ratio	148:01:00
Rope	9.5mm x 24.4m
Dimensions (LxWxH)	615.2mm x 157.5mm x 270.75mm
Wireless Control	Available as Optional Extra
Mounting Plate	Not Included
Line Speed - No Load	18.9 m/min
Line Speed - Full Load	1.5 m/min
Amp Draw - No Load	75 amps
Amp Draw - Full Load	430 amps
Manufacturer	Superwinch

3-year warranty on all electrical components.

We make every effort to ensure that we have stock of all Talon winches available at all times. Should we not have your required Talon winch in stock there may be a short delay of a few days whilst assembly takes place. If this is the case we will contact you immediately.
