HAKKIPIILKE®

Falcon

NEW POWER AND SPEED

Hakki Pilke Falcon is the newest member of the Hakki Pilke family of wood processors.

- The splitting function is **by far the best in the market in its category**. Thanks to the hydraulic functions (saw and conveyors) the machine has no V-belts.
- **A one-hand control lever** makes the machine very easy to use and there is an active safety cover for increased safety and making the machine easier to use
- The **speed of the machine is automatically adjusted** according to the size of the trunks.
- An **adjustable hydraulic lubrication pump** guarantees a long life for the saw blade and chain.
- **Self-filling chain lubrication pump** gets the oil from a separate chain oil can which can be easily and rapidly replaced.
- The structure of the machine's lower parts enables **easy access to clean underneath**. A wide array of tailor made options are available for the Falcon to enhance it's functions and value.
- The control box similar to that of Hakki Pilke Hawk 25 has been included in the new Hakki Pilke Falcon.

Falcon Specification	
Maximum Diameter wood	350 mm
Log length	250-500 mm
Guide bar length	16"
Ram	4.2 - 7 tons
Power requirement	10 Kw / 20 hp
Height	2530 mm
Width	2550 mm
Depth	1250 mm
Weight	870 kg
Outward conveyor length	4000 mm (4m)
Splitter supplied as standard	2/4
Optional extra's	6 way splitter
	Hakki feed tables
	Cleaning discharge conveyor
	Conveyor speed control
	Additional auxiliary kit for table and table infeed rollers
	Size guide plate for infeeding
