

HAKKI PILKE®

cs 900

- Ø 900 MM HARD METAL BLADE
- AUTOMATIC HIGH-SPEED VALVE
- ADJUSTABLE STROKE LENGTH
- BEST EFFICIENCY WITH SHORT CUTTING LENGTHS

MAXIMUM CIRCULAR POWER FOR LARGE TREES!

The CS 900 is the newest Hakki Pilke firewood processor with a hard metal blade for professional use. **The 900 mm diameter circular saw** and **automatic high-speed valve** enables the efficient cutting and splitting of logs with a **diameter of 370 mm**.

Automatic high-speed valve ensures that the fastest splitting speed is in use when the splitting power of high-speed mode is enough. If additional power is needed, **the maximum power of the splitting cylinder will automatically go on**.

Adjustable **splitting length increases efficiency** remarkably when stroke length is adjusted for the wood length. For example when cutting 250 mm long wood, the trajectory of the splitting cylinder is over twice as short as cutting the wood of maximum length.

Full **hydraulic controls**, perfect control of the wood while cutting and splitting, and the **hydraulic-driven slewing output conveyor** ensures the efficient usage of Hakki Pilke CS 900.

Full hydraulic and easy control.

Ø900 mm hard metal blade.

Adjustable splitting length from 250 to 550 mm .

Manufacturer **MAASELÄN KONE OY**

TECHNICAL SPECIFICATION

Features

- domestic use	
- industrial use	☑
Max. log diameter	370 mm
Wood cutting length	250-550 mm
Circular saw	900 mm
Splitting force	10-16 t

Power source

Tractor/electric motor	☑
Electric motor	15 kW
Power consumption	50 hp
Fuse size	35 A

Machine dimensions in the transport position

Height	2300 mm
Width	1750 mm
Length	2530mm
Weight (kg)	1780 (tr) / 1850 (em)
Output conveyor length	4 m

Splitting blades

2/6	☑
Hydraulic height adjustment	☑

Accessories

- 2/4, 2/8 and 12 splitting blades
- Oil cooler 12 V DC
- Electric oil heater 300 W, 220 V AC (for temperature below -15°C)
- Sawdust blower
- Wood holders

Manufacturer reserves the right to changes.
