

# The NEW zero-compromise sawmill ... Powerful, Reliable & Affordable – Built for Hobbyists who take Pride in their Work

**The LumberMan MN26 can handle logs up to an impressive 26” in diameter (65cm) and mill boards up to 17” wide (42.5cm).**

The backbone of any sawmill is its sawhead. The MN26 boasts the same patented laminated sawhead that’s the foundation of all Norwood bandmills – the proven durable design that can withstand the everyday rigors of heavy milling.

It’s not enough for the LumberMan to be able to just handle logs bigger across than oil barrels. You’ve got to maximize cuts per hour. Which is why the LumberMan MN26 is engineered to mill with faster cycle-times using patented Norwood sawmill technology like auto-locking sawhead and available optional auto-lube. That’s what it means to be a Norwood – Tough on the outside. Smart on the inside.

## Affordability Without Compromise

With the MN26, you start with a sawmill that gets the job done quickly, capably and efficiently. And, just because the price doesn't break the bank, doesn't mean you compromise. The LumberMan MN26 gives you:

- **The capacity you need.**
- **The versatility you want.**

No two jobs are the same. That's why Norwood offers so many options to help get all those jobs done, from available towing package to the available log loading and rolling system that saves you time and sweat. How can you put your stamp on your LumberMan MN26? Count the ways. Norwood engineered the MN26 to accept every capacity-boosting attachment built for the LM29. Check them out in the Manual Options!

## LumberMan MN26 features

- **Blade-Lube System**  
Standard-equipped blade lubrication helps keep blades pitch-free. Available optional auto-lube system automatically turns water on and off each cut.
- **Heavy-Duty Clutch**  
Heavy-duty centrifugal clutch safely engages the blade when you depress the push-handle-mounted throttle lever.
- **Log-Clamps**  
Dual vertical-adjust, 3-function log rests optimize clamping of saw-logs, cants and boards. Also included is a screw-crank log-dog as standard equipment.
- **Solid Frame**  
Rigid 4-post carriage delivers superior stability and performance over torsionally weaker 2-post or cantilevered systems.
- **Blade-Guides**  
Dual fixed precision-machined and hardened blade guides support cuts as wide as 17" (42.5cm).
- **Levelling-Feet**  
For perfect log-deck alignment, the LumberMan has available optional ten micro-adjust levelling feet.

## Specification

It's easy to pick the Norwood portable sawmill that's right for you!

It's almost as sure as the sun will come up tomorrow you'll be looking for more milling capacity and more functions, later on down the road. You need a sawmill that can grow with you. Norwood believes in making a few portable bandsaw mills really well and then putting you in charge of where your mill goes from there.

### Cutting Capacities

**Log Diameter:** 26" (65cm)

**Board Width:** 17" (42.5cm)

**Log Length:** 12'9" (3.8m) (or longer with extensions)

### Power Selections

**Engine Type:** 13hp (420cc) OHV Briggs

### Dimensions

**Bed Length:** 16' (4.8 m)

**Width:** 5'11" (1.8 m)

**Blade Length:** 144"

**Bandwheels:** 19" x 5/8" (47.5 x 1.5 cm)

**Drive:** Centrifugal clutch

**Set Display:** 2", 1", 3/4", 9/8", 6/4" standard scale

### Standard Features & Attachments

- Laminated Sawhead
- Auto-Sawhead Lock
- Manual Blade Lube System
- Roller Blade Guides w/Twin-Sealed Bearings
- Comfort-Height © Adjustable Operator Station
- Levelling Feet
