HAKKIPILKE®

Easy 50s

THE NEW FIREWOOD

Maaselän Kone Oy, the pioneering manufacturer of firewood processors, introduces the newly reformed HakkiPilke Easy 50S. HakkiPilke 50S is by far the most powerful professional machine on the market. A metric cube of firewood created in seven piston pushes makes the machine very productive, and automatically (4-30 ton) variable splitting makes it particularly economic and profitable.

Strong and durable frame

The HakkiPilke 50S has a very strong frame structure thanks to the new steel material and a quick-lock equipped top support. The top support is made especially safe but easy to open, to fasten blade exchange and make transportation of the machine easier. These make the new 50S very durable workhorse for the professional firewood producer.

Ergonomic and safe use

HakkiPilke Easy 50s is made safer and easier to use than ever. The control panel is easy to use. Feeding, cutting and splitting are controlled with one joystick, and the feeding conveyor can be stopped and reversed easily.

The adjustable legs make the deployment of the machine fast and easy, even on uneven terrains. A new control board has been added to make the feed flow even smoother.

NEW GENERATION WOOD FACTORY

- **MOST EFFECTIVE PROFESSIONAL MACHINE FOR INDUSTRIAL FIREWOOD PRODUCTION**
- **TRACTOR- OR ELECTRICAL USE**

For the professionals

The daily maintenance has been thought through and according we made changes to the machine's casing. The solid-bottomed splitting trough, and integrated dust remover ensure that the working conditions remain clean and healthy for the operator. The new security cage's holes and color is designed optically to maximise the vision and make monitoring of the work easy for the operator's eyes.

HakkiPilke 50S is a heavy-weight champion, but what is important for our clients is that it is still relatively lightweight and the weight distribution is safe for transportation in a medium-sized tractor's three-point lifting device. Due to its superior features, HakkiPilke Easy 50S is the first choice of firewood professionals around the world.

HAKKIPIILKE®

Easy 50s

TECHNICAL SPECIFICATIONS

HAKKIPIILKE Easy 50s

Features

- industrial production	•
Max log diameter	470 mm
Max wood length	600 mm
Chain saw, blade length	20 "
Saw chain	1,6 mm, 71 links
Splitting force, variable	4-30 t

Power source

Tractor	•
Tractor/electrical motor	•
Electrical motor	15 kW
Power demand	50 hp
Fuse size	35 A

Dimensions in transport position

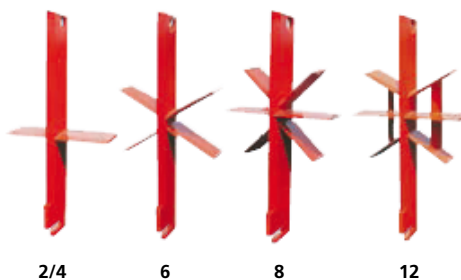

Height	2,900 mm
Width	3,100 mm
Length	1,520 mm
Weight	2,100 kg
Length of the output conveyor, 4,0 m	

Splitting blade options

2/4	•
6	•
8	•
12	•
Height adjustment	hydraulic

ACCESSORIES

Splitting blades

Log Hoists

HAKKILIFT 472

Length	2150 mm
Weight	100 kg
Width	1150 mm
Height	50/1125 mm

Wood holders

HAKKIFEED 422

Length	2480 mm
Weight	285 kg
Width	2280 mm
Height, adj.	880-1320 mm 1230-1660 mm
- Hydraulic dispenser	
- Adjustable legs	
- 2 pincher rolls	

HAKKIFEED 471

Length	3600 mm
Weight	616 kg
Width, adj.	960-1500 mm
Height, adj.	1000-1440 mm
- 2 pincher rolls	
- Adjustable legs	
- Mechanical separator	
- Extension accessory 2-6 m	

HAKKIFEED 472

Length	3500 mm
Weight	925 kg
Width	2200 mm
Height, adj.	1000-1440 mm
- 3 pincher rolls	
- Adjustable legs	
- Mechanical separator	
- Extension accessory 2-6 m
