

**YES! – A sawmill this useful ... this reliable  
... this easy-to-use is within your reach!**

## USEFUL and EASY TO USE

The LumberMate LM29's healthy appetite for hardwood and softwood logs up to 29" (72cm) in diameter combined with its 22" (55cm) throat opening, give it the muscle to tackle most milling needs. And it's so easy to use that even first-time sawyers get to milling like seasoned pros in no time. If you want to:

- ✓ Mill for fun or extra income,
- ✓ Make specialty cuts for fine woodworking,
- ✓ Build your house or cabin out of your own trees,
- ✓ Or even cut valuable lumber to sell for profit ...

...The Norwood LumberMate LM29 is perfect for you.

## INNOVATION:

With more portable sawmill patents than all the other portable sawmill companies around the world combined, Norwood is the proven global leader in sawmilling technology. The LumberMate LM29 is equipped with some of Norwood's latest groundbreaking advancements in sawmill innovation including Norwood's patented auto-locking sawhead and laminated sawhead technologies.

## QUALITY-BUILT:

Quality-built in the U.S.A. and Canada by highly-trained, highly-skilled operators with leading-edge fabrication and machining technologies, the LumberMate LM29, like all Norwood portable sawmills, is built rugged to accurately cut hundreds of thousands of board-feet of valuable lumber day-in and day-out.

## VERSATILE:

Fully-customizable, the LumberMate LM29 keeps all your options open – Add available attachments at any time to meet your growing sawmilling needs ... Like extensions to mill longer logs, trailer system to tow your sawmill from woodlot to woodlot, log loading/rolling system, toe boards, board offloading rollers, lap siding/shingle making jigs, etc..

Your sawmilling career is just beginning. There's a good chance your operation will grow over time. With the Norwood LM29, your sawmill will grow with you.

## FEATURES

- ✓ **Made in the U.S.A. & Canada** – All parts in the LumberMate LM29 are quality-built in Canada and the U.S.A. by highly-trained, highly-skilled operators with cutting-edge fabrication and machining technologies. Norwood does **not** make anything in China, Taiwan or Poland, like some other companies.
- ✓ **Industrial-Grade Powder-Coat** – Like all forestry equipment bearing the Norwood name, the LumberMate is protected by industrial-grade powder-coat – electrostatically-applied, thermoset polymer cured under heat to create a hard finish which is much tougher than the old-fashioned spray paint used by other companies which is more prone to premature rust, chips and scratches.
- ✓ **Smooth Sawhead Feed** – Guide the sawhead through the cut with finger-tip pressure – allows you to judge the best speed for smooth cuts through knots and denser core wood. No arm-numbing cranking.
- ✓ **Patented Auto-Lock Sawhead** – Patented Norwood sawhead friction-winch system delivers easy, effortless vertical sawhead operation. Auto-locking sawhead eliminates two time-consuming operations at every cut – the LM29 looks after locking and unlocking the sawhead for every board you mill. That saves hours of wasted time and increases your production.
- ✓ **Blade-Guide Rollers** – Precision-machined, hardened and zinc-dichromate-plated 1¼" blade-guide rollers each fitted with sealed double ball-bearings. Optional ceramic guides also available.
- ✓ **Sawdust Exhaust** – Sawdust exhausts on far side of mill away from you – not at your feet and in your shoes like other sawmills.
- ✓ **Comfort-Height Operator's Station** – Standard on the LumberMate LM29, the convenience and comfort of the ergonomic tilt operator's station.
- ✓ **Easy Working Position** – Elevate as desired for easy log loading or add the optional trailer system with support legs.

- ✓ **Blade Lube System** – Keeps the saw blade pitch-free in softwoods. Delivers water directly to the blade at the point of entry into the cut. Large custom-molded water bottle with wide-mouth filling port for easy refilling. Optional auto-lube system to automatically turn the flow of water on and off also available.
- ✓ **Log-Clamping System** – Screw-crank log-dog and opposing dual vertical-adjust log-rests firmly clamp logs in the round, cants and boards as thin as 1" (2.5cm). 3-function log rests simplify clamping both logs in the round and squared cants, and rotating logs without hang-ups. Micro-precision log-rest adjusting bolts guarantee perfectly true 90-degree cuts.
- ✓ **Smooth-Action Carriage Wheels** – Large CNC-machined upper carriage wheels fitted with sealed double bearings key to smooth, effortless rolling action. Rubber under-track wheels for extra security and stability.
- ✓ **Rock-Solid Stability** – Rigid 4-post carriage frame and patented laminated sawhead construction deliver superior strength and torsional stability.
- ✓ **Versatile** – Backed by the brand-name company you can trust, the LumberMate LM29 comes standard as the most reliable, easiest-to-use sawmill in its class. And it gets better ... At any time ... now, or ten years from now, you can add sawmill attachments to grow your ML26 – add extra extensions to mill longer logs, trailer system, log loading/rolling system and more. So you keep all of your options open.

## SAWMILL SPECS

### It's easy to pick the Norwood portable sawmill that's right for you!

It's almost as sure as the sun will come up tomorrow you'll be looking for more milling capacity and more functions, later on down the road. You need a sawmill that can grow with you. Norwood believes in making a few portable bandsaw mills really well and then putting you in charge of where your mill goes from there.

### Cutting Capacities

<b>Log Diameter:</b>	29" (72 cm)
<b>Board Width:</b>	22" (55 cm)
<b>Log Length:</b>	12' 9" (3.8 m)
<b>Engine Type:</b>	13hp (389cc) OHV Honda GX-Series 16hp (479cc) V-Twin OHV Briggs Vanguard

### Dimensions

<b>Bed Length:</b>	16' (4.8 m)
<b>Width:</b>	5'11" (1.8 m)
<b>Blade Length:</b>	144"
<b>Bandwheels:</b>	19" x 5/8" (47.5 x 1.5 cm)
<b>Drive:</b>	Centrifugal clutch
<b>Set Display:</b>	2", 1", 3/4", 9/8", 6/4" standard scale

### Features & Attachments

<b>Laminated Sawhead:</b>	Standard
<b>Auto-Sawhead Lock:</b>	Standard
<b>Manual Blade Lube System:</b>	Standard

Roller Blade Guides w/Twin-Sealed Bearings:	Standard
Comfort-Height © Adjustable Operator Station:	Standard
Levelling Feet:	Standard
Dura-Guide © Ceramic Blade Guides:	Optional
Auto Blade-Lube System:	Optional

## Optional Manual Functions & Attachments

Grow your LM29 when you want ... how you want. Add any of the optional portable sawmill attachments at any time – now, or down the road.

- Boost your mill's capacity.
- Expand your mill's functionality.
- Grow your mill's productivity.

The sawmill can churn out up to a whopping 2200 board feet of lumber a day ... *in its basic configuration*\*\*Add capacity-boosting and productivity-boosting attachments to expand what you can do with your MN26 ... and how fast you can do it. The attachments available are:

- Cam Dogs
- Bed Extensions – 4' (1.2m) Permanent
- Trailer & Support Jack Package
- Log Loader/Roller & Ramps System
- Toe Boards
- Single/Lap Siding Jigs
- Board-Off-Rollers
- Rapid-Dogging & Roller System
- Dura-Guide © Ceramic Blade Guides
- Auto Blade-Lube System
