**Creosoted + Slow grown +  
Kiln dried + Redwood timber  
creates a**

**long life post**

- Swedish manufactured from redwood timber grown in or near the Arctic Circle - giving added strength due to its very **slow rate of growth**
- Posts are machined into an octagonal profile providing a **flat surface for fixing**
- **Kiln dried** for maximum absorption of **high pressure creosote treatment** or **Tanasote® (Copper Oil)** see reverse for more information regarding Tanasote.
- Octopost offer a **25 year guarantee** but have a life expectancy of 30-40 years. See reverse for guarantee
- Each post is **identical** making erecting quicker and giving a **consistency** which is pleasing to the eye
- From **80mm to 200mm diameter** and up to **3.0m in length**

The wood grain rings show **slow growing timber** which gives OCTOPOST **high grade strength**. The timber shown here was from a tree that was over 90 years old when harvested.

Now  
available  
in Tanasote®

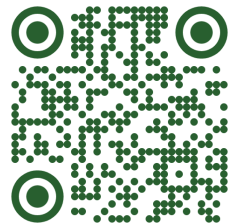

**Octoposts are now available using Tanasote® a unique copper oil treatment. Like creosote, Tanasote® offers many benefits including a long life span of up to 40 years.**

However, Tanasote® has a low odour, is very user friendly and can also be used in sensitive areas such as children's playgrounds. Like the creosote post, Octowood offer a 25 year guarantee on the Tanasote® posts. Tanasote® appears green when first treated but within a year or so will turn to appear similar to a creosote treated post.

Developed in the UK by Arxada, extensive trials have been underway for many years.
