

...simply a mini telegraph pole

**Creosote or Tanasote® treated
redwood timber that's slow grown
and kiln dried creating a**

long life post

- Swedish manufactured from redwood timber grown in or near the Arctic Circle - giving added strength due to its very **slow rate of growth**
- Posts are machined into an octagonal profile providing a **flat surface for fixing**
- **Kiln dried** for maximum absorption of **high pressure creosote** or **Tanasote®**, a revolutionary biocide copper oil treatment see reverse for more information regarding Tanasote.
- Octopost offer a **25 year guarantee** but have a life expectancy of 40 years +.
- Each post is **identical** making erecting quicker and giving a **consistency** which is pleasing to the eye
- Sizes available from **80mm to 200mm diameter** and up to **3.0m in length**

The wood grain rings show **slow growing timber** which gives Octopost **high grade strength**. The timber shown here was from a tree that was over 90 years old when harvested.

Fencing posts (price per post unless otherwise stated)Creosote Tanasote

| | | |
|--|---------------|---------------|
| 80 mm x 1650 mm 154 in a pack (pack price) | £ 6.32 + VAT | £7.20 + VAT |

Octoposts are now available using Tanasote® a unique next-generation, wood preservative in a copper-oil base, designed for exceptional durability, making it ideal for long-life fencing.

Not only are Tanasote® posts engineered for long term performance, but they're also environmentally responsible. They offer a low-odour finish, reduced leaching, and a cleaner, more pleasant handling experience compared to traditional creosote-treated posts.

Backed by extensive field testing, Tanasote® is a sustainable alternative that supports a **40 YEARS + SERVICE LIFE** and comes with a **25 YEAR MANUFACTURER'S GUARANTEE.**

Developed in the UK by Arxada, extensive trials have been underway for many years. Should you like more information about Octopost please use the QR code.
